

Our wish list for 2017

Sub-projects at Adi mission hospital, Dem. Rep. of the Congo. The water supply of the mission hospital is a very bad condition. The way of the pipe system does not make much sense and therefore it causes high pressure losses.

Project 01/17	Solar pump and material: Buying a GRUNDFOS SQF solar pump, with pneumatic switch to automate the water supply and to become more independent from diesel.	€ 5700
Project 02/17	Solar system and material: Buying a complete solar system to run the solar pump.	€ 6300
Project 03/17	Rehabilitation of the main water supply: The main water supply of PCV is broken and leaking. It has to be replaced with HDPE pipes.	€ 1800
Project 04/17	Modification of the water supply: Modifying the direction of the water supply to have a higher pressure at the tap and to have water immediately after opening the tap.	€ 900
Project 05/17	Installation of washbasins in all rooms of the hospital: Up to now there is only one basin in the whole hospital. It is in the operating theatre.	€ 1500
Project 06/17	Construction of a septic tank: Construction of a septic tank with chambers	€ 800
Project 07/17	Construction of a watchman house at the pumping station: The watchman sleeps in the pumping station. The solar pump will be installed close to this house. The watchman will have to care for the whole area.	€ 1000
Project 08/17	Rehabilitation of the lower basin: The inner walls must be painted new. They are not tight.	€ 200

Other independent projects
