

Our wish list for 2018

Subprojects at the mission hospital in Adja, D. R. Congo. So far, the hospital has neither water nor sanitation. The costs are estimated because the site has not yet been surveyed and no pumping test has been carried out. If technically possible, the kindergarden and school will be connected to the water supply, too.

In order to change the situation and improve hygiene, the following measures must be carried out:

Project 01/18	Borehole with preliminary geological survey, filter construction and 72-hour pumping test	€ 9,100
Project 02/18	Solar pump Grundfos solar pump with solar system and material such as lightning protection, etc., including transport and installation.	€ 17,000
Project 03/18	Elevated tank Purchase of a 10,000 litre tonne, including transport	€ 1,300
Project 04/18	Construction of frame for the elevated tank Construction of a 5 meter high frame for the elevated tank	€ 1,000
Project 05/18	Installation of basins So far there are no wash basins in the treatment and examination rooms. Including pipes.	€ 2,000
Project 06/18	Construction of a sewage disposal system Construction of decentralised waste water disposal	€ 500
Project 07/18	Tools generator, angle grinder, impact drill, thread cutter ...	€ 1,000

Donations account:

Bank: Kreissparkasse Waiblingen

IBAN: DE87 6025 0010 0015 0183 62

BIC: SOLA DE S1WBN

Reason for payment: Donation receipts will be sent in the next year. Please, give you exact address.

Subprojects at the mission hospital in Abedju, D. R. Congo. So far, the hospital has neither water nor sanitation. There is a hand-made hand pump that is defective. A hand pump cannot be used to supply water to a network of pipes. The costs are estimated because the site has not yet been surveyed and no pumping tests have been carried out. In order to change the situation and improve hygiene, the following measures must be carried out:

Project 08/18	Pump test 72-hour pumping test to determine the performance of the old well	€ 3,200
Project 09/18	Solar pump Grundfos solar pump with solar system and material such as lightning protection, etc., including transport and installation	€ 12,000
Project 10/18	Elevated tank Purchase of a 10,000 litre tonne, including transport	€ 1,300
Project 11/18	Construction of frame for the elevated tank Construction of a 5 meter high frame for the elevated tank	€ 1,000
Project 12/18	Installation of basins So far there are no wash basins in the treatment and examination rooms. Including pipes.	€ 2,000
Project 13/18	Construction of a sewage disposal system Construction of decentralised waste water disposal	€ 500

Andere eigenständige Projekte:

Project 14/18	Workshop Water treatment in Geita, Tanzania	€ 5,000
Project 15/18	4x Elektrolyse-Kit für Wasseraufbereitungsseminare je € 285	€ 1,140
Project 16/18	Feldmikroskop für Wasseraufbereitungsseminare	€ 800
